HIGHLIGHTS OF SECOND-QUARTER BANKING INDUSTRY PERFORMANCE

- ***BANKS EARN \$10.4 BILLION IN SECOND QUARTER***

Commercial banks' combined net income of \$10.4 billion was the second-highest quarterly total ever reported, after the \$10.9 billion registered in the first quarter of this year (when extraordinary accounting gains added \$1.8 billion to earnings). Industry profits were up by almost one-third higher than a year ago. The average return on assets was above one percent for the second consecutive quarter at 1.18 percent, down slightly from the 1.24 percent average reached in the first quarter.
- ***CORE EARNINGS REACH AN ALL-TIME HIGH***

Net operating income—excluding extraordinary gains and gains from securities sales—totaled a record \$9.8 billion in the second quarter, an increase of \$1.4 billion over the \$8.4 billion earned in the first quarter of 1993. Increased net interest income and lower loss provisions were the primary factors in the earnings improvement.
- ***LOAN LOSS PROVISIONS DROP TO LOWEST LEVEL IN FOUR YEARS***

Lower provisions for loan losses made the greatest contribution to the improvement in bank earnings. Banks set aside \$4.2 billion in the second quarter, \$2.1 billion less than a year ago, and \$521 million less than in the first quarter of 1993. This was the lowest quarterly loss provision since the \$3.6 billion provision in the first quarter of 1989.
- ***TROUBLED ASSETS FALL \$7.3 BILLION IN THE SECOND QUARTER***

Improvement in asset quality continued to be evidenced by falling levels of noncurrent loans and shrinking inventories of foreclosed properties. Noncurrent loans declined for the ninth consecutive quarter, falling by \$4.7 billion. Other real estate owned fell for the third consecutive quarter, decreasing by \$2.6 billion. Net loan charge-offs totaled \$4.5 billion in the second quarter, a slight increase from the \$4.2 billion in net charge-offs taken in the first quarter, but a substantial decline from the \$6.1 billion charged-off in the second quarter of 1992.
- ***LOANS INCREASE BY \$44 BILLION***

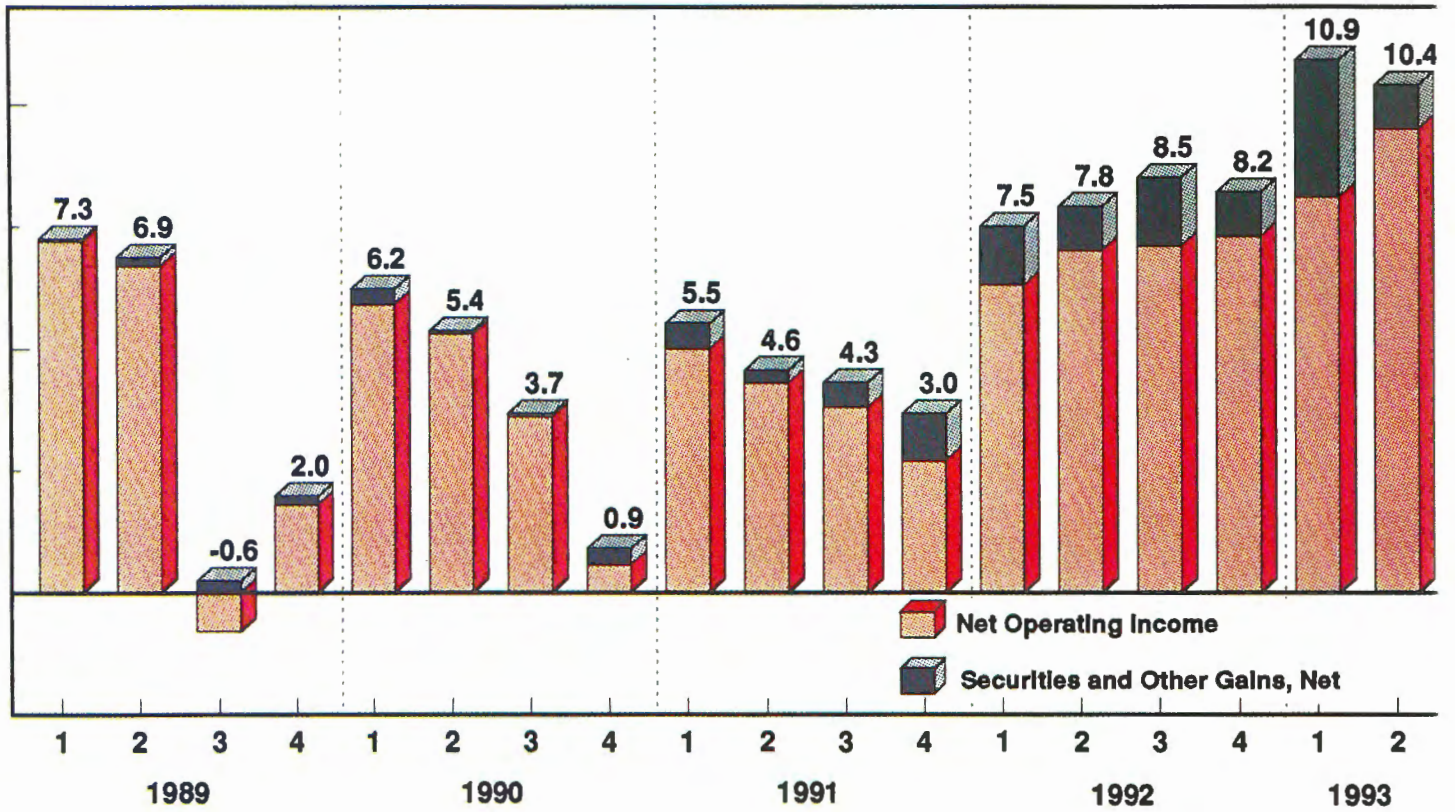

Total loans and leases held by commercial banks rose sharply in the second quarter, after shrinking in eight of the previous nine quarters. Total loans and leases grew by \$44.2 billion during the quarter, the largest quarterly increase since the fourth quarter of 1986, when total loans and leases grew by \$73.5 billion. Growth in bank holdings of residential mortgage loans contributed \$20.2 billion of the increase. Commercial and industrial loans registered modest growth for the first time in thirteen quarters, but this was due to an increase in loans to foreign commercial borrowers.
- ***EQUITY RATIOS REACH HIGHEST LEVELS IN 30 YEARS***

Commercial banks continued to add new capital in the second quarter. Total equity capital grew by \$8 billion, raising the industry's average equity-capital-to-assets ratio to 7.89 percent, the highest level since 1963.
- ***BIF-INSURED SAVINGS BANKS EARN \$414 MILLION IN THE QUARTER***

Savings banks earned a 0.82 percent annualized return on average assets in the second quarter. Net income was \$103 million below the amount earned in the first quarter, when one-time accounting gains and other nonrecurring extraordinary items contributed \$101 million to savings banks' earnings. One savings bank failed in the second quarter, and the number and assets of savings banks on the FDIC's "Problem List" continued to decline.

Capital Category Distribution
For All Insured Commercial Banks and
BIF-Insured Savings Banks as of 6/30/93

	Banks		Assets	
	Number of	Percent of Total	In Billions	Percent of Total
Well Capitalized	11,284	97.2%	\$3,607.5	95.60%
Adequately Capitalized	234	2.0%	\$150.4	3.99%
Undercapitalized	47	0.4%	\$7.8	0.21%
Significantly Undercapitalized	30	0.3%	\$6.1	0.16%
Critically Undercapitalized	12	0.1%	\$1.6	0.04%

Note: This table is based solely on Call Report data and does not reflect supervisory upgrades or downgrades. Of the 12 banks categorized as Critically Undercapitalized (all BIF-insured institutions), four banks with assets of \$117 million failed and one bank with total assets of \$25 million improved from Critically Undercapitalized to Significantly Undercapitalized, between June 30 and September 2. One bank with total assets of less than \$400 thousand was in the process of liquidation on June 30, and has been excluded from this table.

Capital Category Definitions

	Total Risk-Based Capital *		Tier 1 Risk-Based Capital *		Tier 1 Leverage		Tangible Equity
Well Capitalized	>= 10%	and	>= 6%	and	>= 5%		--
Adequately Capitalized	>= 8%	and	>= 4%	and	>= 4%		--
Undercapitalized	< 8%	or	< 4%	or	< 4%		--
Significantly Undercapitalized	< 6%	or	< 3%	or	< 3%		--
Critically Undercapitalized	--		--		--		<= 2%

* As a percentage of risk-weighted assets.

Note: Standards vary in some instances for the strongest banks, banks anticipating growth, and banks subject to supervisory agreements or directives.
